9 The reading of a speedometer fitted to the front wheel of a bicycle is directly proportional to the angular velocity of the wheel. A certain speedometer is correctly calibrated for use with a wheel of diameter 61 cm but, by mistake, is fitted to a 51 cm wheel.

What is the value of $\dfrac{\text{indicated speed} - \text{actual speed}}{\text{actual speed}} \times 100\%$?

A +16% **B** −16% **C** +20% **D** −20%
