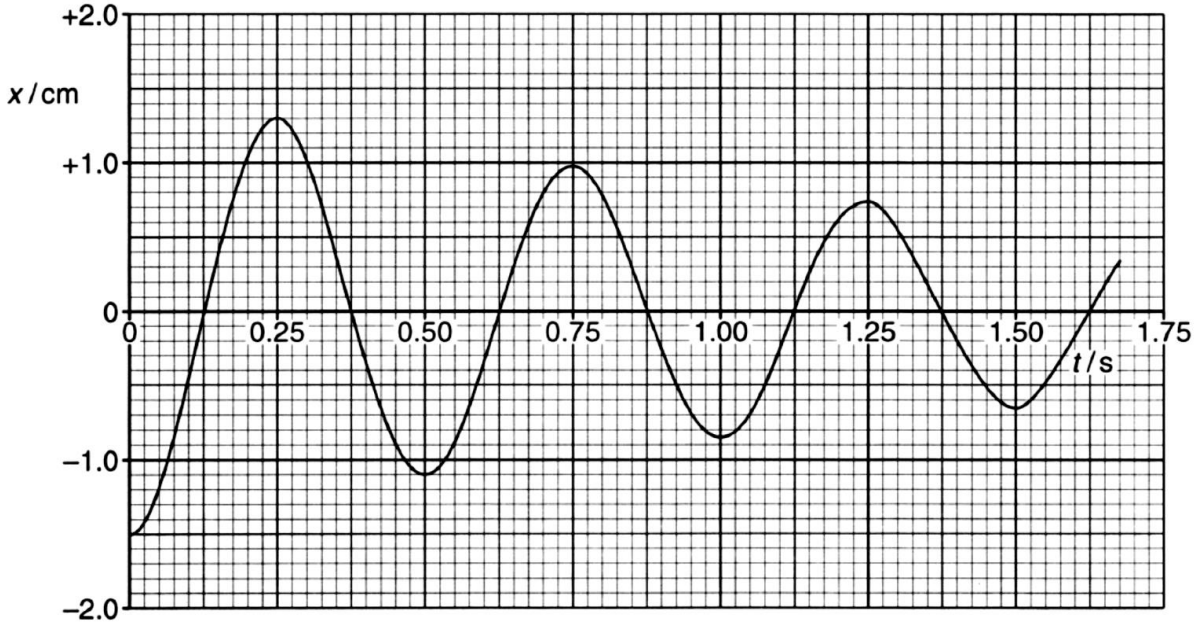
8 A wooden block of mass 200 g floats on water and oscillates vertically. Its vertical displacement x varies with time t as shown.



What is the decrease in maximum gravitational potential energy of the oscillations during the first 1.5 s?

A 0.7×10^{-3} J **B** 2.9×10^{-3} J **C** 3.6×10^{-3} J **D** 1.7×10^{-2} J
