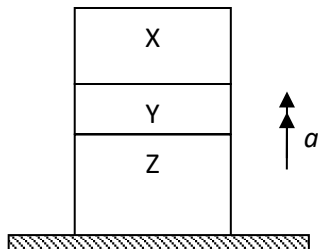
4 Three crates X, Y and Z of masses *3m, m* and *5m* respectively, are stacked on top of one another on the floor of a lift which is moving upwards with an acceleration *a*.



What is the magnitude of the force exerted by crate Y on crate Z during this acceleration?

A $4mg + 4ma$ **B** $4mg + 5ma$

C $4mg - 4ma$ **D** $4mg - 5ma$
