

- 1 The drag coefficient C_d is a number with no units. It is used to compare the drag on different cars at different speed. C_d is given by the equation

$$C_d = \frac{2F}{v^n \rho A}$$

where F is the drag force on the car, ρ is the density of the air, A is the cross-sectional area of the car and v is the speed of the car.

What is the value of n ?

A 1

B 2

C 3

D 4
