

- 4 A clay pigeon is launched vertically into the air from the ground.

A marksman lies 170 m away from the launching device on level ground. Just as the clay pigeon reaches its maximum height of 60 m , the marksman fires a bullet aimed directly at the clay pigeon. The bullet leaves the rifle with a speed of 300 m s^{-1} . At what time after the bullet is fired is the clay pigeon hit? Assume air resistance is negligible.

- A** 0.17 s **B** 0.57 s **C** 0.60 s **D** 1.66 s
