

- 16** The root-mean-square speed of molecules of an ideal gas which is at an initial temperature of 350 K, is increased by 20%.

What is the new temperature of the ideal gas?

A 370 K

B 400 K

C 420 K

D 500 K

- 17** An electron of velocity v enters a uniform electric field between two parallel plates at right
