

- 3 The graph shows how a physical quantity varies with time

Which event could best be represented by the graph?

- A** acceleration of a firework rising to a maximum height and falling to the ground
- B** acceleration of a skydiver leaving an aircraft, falling, opening a parachute and falling to the ground
- C** speed of a javelin as it leaves an athlete's hands, falls and sinks into the ground
- D** speed of a high jump athlete leaving the ground, jumping over a bar and descending to the ground
