		$\langle P \rangle = I_{rms}^2 R = \left(\frac{\ }{\sqrt{2}}\right)^2 (10) = 125\ W$
28	**B**	V_0 = 20/2 = 10 V

		For half wave rectified circuit, $V_{rms} = V_0 / 2 = 5$ V $I_{rms} = V_{rms} / R = 5 / 50 = 0.10$ A
29	**B**	Using Einstein's Photoelectric equation, $\frac{hc}{\lambda} = \phi + eV_s$
