Paper 2 (80 marks)

1a	The gradient of the graph is the speed or velocity, And it becomes constant (from approximately 0.8 s onwards)	B1 B1
1bi		
	At t = 0.40 s, gradient = (2.80 – 0) / (1.20 – 0.20) = 2.8 So, speed = 2.8 ms^{-1} (allowed range is ± 0.1. if answer > ±0.1 but ≤ ±0.2, then award 1 mark)	M1 A1
1bii	Average speed = 0.55 / 0.40 = 1.375 = 1.38 ms^{-1}	A1
1ci	Distance travelled = ½ at^2 = ½ (9.81) $(0.40)^2$ = 0.7848 = 0.78 m	B1

1cii		
	Continuous curve line starting from zero, with increasing gradient Curve line is smooth, always above the given line, never vertical or straight Passes through (0.40, 0.80). Accuracy up to half small square	M1 A1 A1
