		$(2m)$ 2
4.	**D**	During acceleration, $W - mg = ma$, so $W = m(9.81 + 2.0)$ During deceleration, $mg - W' = ma$, so $W' = m(9.81 - 2.0)$ So $\frac{W'}{W} = \frac{9.81-2.0}{9.81+2.0} = 0.661$
5.	A	Since the same load is applied, for X, if extension is L, then extension for Y
