Qn	Ans	Solution
1	D	Units of $\dfrac{\rho h V}{g}$ $= \dfrac{\text{kg m}^{-3} \times \text{m} \times \text{m}^3}{\text{N kg}^{-1}} = \text{kg}^2\ \text{N}^{-1}\ \text{m}$ Units of $\dfrac{\rho g}{hV}$ $= \dfrac{\text{kg m}^{-3} \times \text{N kg}^{-1}}{\text{m} \times \text{m}^3} = \text{N m}^{-7}$ Units of $\rho g^2 h$ $= \text{kg m}^{-3} \times \left(\text{N kg}^{-1}\right)^2 \times \text{m} = \text{N}^2\ \text{kg}^{-1}\ \text{m}^{-2}$ Units of $\rho g h V$ $= \text{kg m}^{-3} \times \text{N kg}^{-1} \times \text{m} \times \text{m}^3 = \text{N m}$ (which is units of work done, and hence that of energy)
2	A	Average of the 6 readings
