	$\theta = 60$
19	**D** Using $d\sin\theta = n\lambda$: $\frac{1}{N_1}\sin\theta = 2\lambda$ _(1) $\frac{1}{N_2}\sin\theta = 3\lambda$ _(2)

	Dividing the 2 equations will give $\dfrac{N_1}{N_2} = 1.5$
20	**D**
