11 Answer: A

$$\emptyset = -\frac{GM}{r}$$

$r\_A = -\frac{GM}{\emptyset\_A}$ and $r\_B = -\frac{GM}{\emptyset\_B}$

BA= r_B – r_A

$$= -GM\left(\frac{1}{\emptyset_B} - \frac{1}{\emptyset_A}\right)$$

= 0.89 x 10^6 m

$r\_C = -\frac{GM}{\emptyset\_C}$ and $r\_B = -\frac{GM}{\emptyset\_B}$

CB= r_C – r_B

$$= -GM\left(\frac{1}{\emptyset_C} - \frac{1}{\emptyset_B}\right)$$

= 1.11 x 10^6 m
