Option C is correct since the total K.E. before and after collision is the same for an elastic collision.

7 **L2**	Solution: B  Net force towards centre of curve provides centripetal force $mg - R = mv^2/r$ where R is the normal contact force on car by road car loses contact with road $R = 0$ $\Rightarrow$ $v = \sqrt{rg} = 17.2$ m s^{-1}	

8	Solution: B
