		Hence highest order = 5^{th}; ∴total number of diffracted images = 5 + 5 = <u>10</u>
19	B	Effective resistance of B and D = effective resistance of C and E = (10 x 10)/(10 +10) = 5.00 Ω Total effective resistance $= (\frac{1}{10} + \frac{1}{10})^{-1}$ = 5.00 Ω  Current through cell = V/I = 9.0 /5.00 = 1.80 A
20	B	$P = \frac{E^2R}{(R+2+r)^2} = \frac{6^2R}{(R+7)^2}$
