28	**A**	By Photoelectric Equation: $hf = \Phi + \mathrm{KE}_{\mathrm{max}}$ Work function of the metal, $\Phi = hf - \mathrm{KE}_{\mathrm{max}} = (6.63\times10^{-34})(1.0\times10^{15}) - (2.6\times10^{-19}) = 4.03\times10^{-19}$ J $E = hf' - \Phi = (6.63\times10^{-34})(2.5\times10^{15}) - (4.03\times10^{-19}) = 1.3\times10^{-18}$ J
29	**D**	Energy released = BE [illegible] – BE [illegible]
