|---|---|---|
| | | Resultant force is towards X. |
| 26 | B | Faraday's Law, the e.m.f. induced in the coil of wire rotating in a magnetic field is proportional to the rate of change of flux in the coil.<br>$E = -\frac{d\phi}{dt} = -\frac{d(NBA)}{dt}$<br>Hence emf does not depend on resistance of coil. |
| 27 | D | Given: peak voltage V and peak current across a resistor R |
