		$V = 0.15 / [7.8 \times 10^{28} \times (0.35 \times 10^{-3} / 2)^2 \pi \times 1.6 \times 10^{-19}] = 1.2 \times 10^{-4}$ m s^{-1}
25	**B**	For X, $B = (100)(1.5)\mu_o / (2)(0.120) = 625\ \mu_o$ out of the plane. For Y, $B = (100)(1.0)\mu_o / (2)(0.180) \approx 278\ \mu_o$ into the plane. Therefore, resultant $B = 625\ \mu_o - 278\ \mu_o = 347\ \mu_o$ out of the plane.
26	**C**	Attraction towards Y and Z
