1.	**Ans: D** Option A is wrong. $F = ma \Rightarrow N \equiv \dfrac{kg}{ms^{-2}} = kg\ m\ s^{-2}$ Option B is wrong. $f = \dfrac{1}{T} \Rightarrow Hz \equiv s^{-1}$ Option C is wrong. $W = Fd \Rightarrow J \equiv N\ m$ Option D is correct. $F = BIL\sin\theta \Rightarrow B = \dfrac{F}{IL\sin\theta} \Rightarrow T \equiv \dfrac{kg\ m\ s^{-2}}{A\ m} = kg\ A^{-1}\ s^{-2}$
2.	**Ans: B**
