

- 22** In the circuit shown, all the resistors are identical and the cell and all the ammeters have negligible resistance.

The reading of ammeter A₁ is 0.60 A.

What are the readings of the other ammeters?

	reading of ammeter A ₂ / A	reading of ammeter A ₃ / A	reading of ammeter A ₄ / A
A	1.0	0.3	0.1
B	1.4	0.6	0.2
C	1.8	0.9	0.3
D	2.2	1.2	0.4
