

18 W, X, Y and Z are four points on a square as shown.

A point charge $+Q$ is fixed at W. Another point charge $-Q$ is moved from X to Y.

Which of the following statements is true?

- A** The electric potential at Z will increase.
- B** The electric potential energy of the system will decrease.
- C** The attractive force between the two charges will increase.
- D** The magnitude of the electric field strength at Z will increase.
