27 The diagram shows a bent piece of wire of overall length $2L$ conducting a current I at right angles to a uniform magnetic field of flux density B.

The field is directed into the plane of the page.

What is the magnitude and direction of the magnetic force on the wire.

A BIL towards the bottom of the page

B BIL towards the top of the page

C $2BIL$ towards the bottom of the page

D $2BIL$ towards the top of the page
