4 A mass of 0.40 kg moving along a smooth surface at 0.080 m s^{-1} collides with the side of a vertical wall at an angle of 60°. The mass is in contact with the side of the wall for 0.20s. It bounces off at the same angle with the same speed.

What is the magnitude of the average force the wall exerts on the ball along XY?

A 0.080 N **B** 0.14 N **C** 0.16 N **D** 0.28 N
