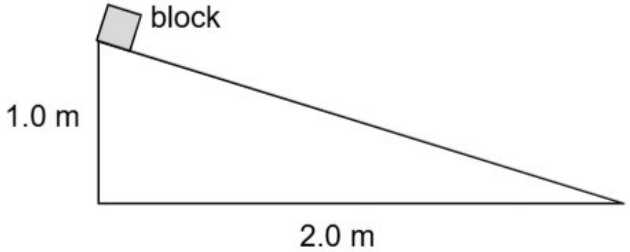
5 A block of mass 5.0 kg is released from rest and slides down a ramp of horizontal length 2.0 m from an initial height of 1.0 m. A constant frictional force of 4.0 N acts on the block as it slides.



What is the speed of the block at the bottom of the ramp?

A 4.0 m s^{-1} **B** 4.4 m s^{-1} **C** 16 m s^{-1} **D** 40 m s^{-1}
