7 A ball X moving on a frictionless table with kinetic energy E and momentum p makes a head-on inelastic collision with an identical ball Y which is initially at rest.

Which of the following options shows possible values for the total kinetic energy and total momentum of both X and Y after the collision?

	total kinetic energy	total momentum
A	$\frac{E}{2}$	$\frac{p}{2}$
B	$\frac{E}{2}$	p
C	E	$\frac{p}{2}$
D	E	p
