

		r	1.2
11	C	Gravitational force provides centripetal force for the moon to move in circular motion. $F_g = F_c$ $\frac{GMm}{r^2} = mr\omega^2 = mr\left(\frac{2\pi}{T}\right)^2$ $\therefore T^2 \propto r^3$ $\left(\frac{T}{5T}\right)^2 = \left(\frac{R}{R_2}\right)^3 \Rightarrow R_2 = 2.9R$	
12	A	When two objects A and B are placed in thermal contact, heat flows from the hotter
