

18 Which statement about an electric field is **incorrect**?

- A** The electric field strength is a vector quantity.
- B** The electric field strength is zero at all points where the potential is zero.
- C** The electric field strength at a point is a measure of the potential gradient at that point.
- D** The electric field strength at a point is a measure of the force exerted on a unit positive charge at that point.

19 Two equal and opposite charges $+q$ and $-q$ are situated 1.00 m apart
