		Hence e.m.f of the battery is $3+9=12$ V.
24	**C**	magnetic force $= BIL\sin\theta$ $= (3.4\times10^{-2})(3.7)(0.050)\sin70°$ $= 5.9\times10^{-3}$ N By Fleming's left-hand rule, since magnetic field is directed to the left and the current has a component downwards, the magnetic force is directed into the page.
25	**B**	Force on electron $= Bqv$
