	and a lower (e.m.f. and hence) current is induced.
25	**A** Let PQ be a straight conductor: Using Fleming's right hand rule, current flows from P to Q. As P and Q behaves like a battery, current flows from low to high potential. Hence, P is of a lower potential.
26	**C** $\sqrt{4^2 \times 1 + 2^2 \times 2 + 0 \times 1}$
