11	The diagram shows four equipotential lines in a gravitational field. Which arrow (**A**, **B**, **C** or **D**) shows the direction of the gravitational field strength at point X? 
L1	**Answer: A** **Gravitational field lines intersect the equipotential lines at <u>right angles</u>.** **➔ Eliminate options B and D.** **Gravitational field strength *g* always acts in the <u>direction of decreasing potential</u> *ϕ*** $\left[g = -\frac{d\phi}{dx}\right]$ **➔ Answer is A.**
