$= 35 \times (20 \times \pi \times 0.35) = 770\ \text{W}$

10 C Tension T provides centripetal force.

$$T = \frac{mv^2}{r} = \frac{(0.30)(4.0)^2}{0.60} = 8.0\ \text{N}$$

Net force F, due to weight W and tension T

$$F = \sqrt{T^2 + W^2} = \sqrt{8.0^2 + (0.30 \times 9.81)^2} = 8.52\ \text{N}$$
