18	**B**	For image to be resolved, $\theta > \frac{\lambda}{b} = \frac{500 \times 10^{-9}}{25 \times 10^{-3}} = 2.0 \times 10^{-5}$ rad Minimum distance = (9.0) (2.0×10^{-5}) = 0.18 mm
19	**C**	Let E_R denote the resultant electric field strength at the centre of the square.
