3	(a)	(i)	$f = \frac{1}{T} = \frac{1}{0.6} = 1.67$ Hz	B1
		(ii)	maximum speed = $\omega x_0 = 2\pi(1.67) \times 0.010$ Total energy $= 0.5mv_0^2 = 0.5m\omega^2 x_0^2$ $= (0.5)(0.34)(2\pi(1.67))^2 (0.010)^2$	C1 M1
			$= 0.00187$ J	B1
	(b)	(i)	Forced oscillations/Resonance	B1
		(ii)	1.67 Hz	B1
	(c)		amplitude of oscillations at all frequencies decreases (lines do not intersect)	B1
			peak oscillation at frequency < original	B1
