10 Ans: B (2012/I/12)

Smallest tension at the top, $T_{top} + mg = mr\omega^2$
Largest tension at the bottom, $T_{bottom} - mg = mr\omega^2$

Variation in magnitude = $T_{bottom} - T_{top} = (mr\omega^2 + mg) - (mr\omega^2 - mg) = 2\,mg$
