12 Ans: A

- **Deduce it's a shm fr the graph**
- KE = ½ mv^2 = **½ m ω^2 ($x_o^2 - x^2$),**

  KE is max at max v, **So?**
  Shd be **at x = 0**

- deduce graph is an **inverted parabola** → only A
- TE = PE + KE = constant → **A, B, C & D , ie All are possible**
