

		electric field strength.
22	C	$d = \frac{m}{AL} \rightarrow A = \frac{m}{dL}$ $R = \frac{\rho L}{A} = \frac{\rho L}{\frac{m}{dL}} = \frac{\rho L^2 d}{m} \rightarrow m = \frac{\rho L^2 d}{R}$ Since L and R are the same, $\frac{m_a}{m_c} = \frac{\rho_a}{\rho_c} \times \frac{d_a}{d_c} = \frac{2}{1} \times \frac{1}{3} = 0.67 \text{ (2 s.f.)}$
