

1 **D** $128 \text{ GB} = 128 \times 10^9 \text{ B} = 1.28 \times 10^{11} \text{ B}$

2 **A** measured length = $891.5 \pm 0.5 \text{ mm}$ but true length is 895 mm
891.5 mm is lower by 3.5 mm, so not accurate to within 1 mm
results have absolute uncertainty of 0.5 mm, so all are precise to within 1 mm

3 **D** Option A, B and C are the correct equations of motion
