

- 8 C** Option A and D have the wrong units and can be ruled out immediately. Option B is wrong as vt does not give the total distance traveled as the object is not moving at constant speed.

9 B $a = \omega^2 r = \left(2\pi \times 3000 \right)^2 (8.0) = 7897 \approx 7900 \text{ m s}^{-2}$
