

		such as with gravitational acceleration towards the ground. Area under the v-t graph above and below the horizontal axis should be about the same.
3	A	$v_y = u_y + a_y t = 0 + gt$ $t = \frac{v_y}{g}$ $s_x = u_x t = u \left(\frac{v_y}{g} \right) = \frac{uv}{g}$
4	B	3 forces must intersect at the same point for the system to be in static equilibrium
