

		$= 5:1$
6	A	A: Gravitational pull depends on mass of object and gravitational acceleration due to Earth. B: The cube is already fully submerged in the water hence upthrust will not increase. C: The balance reading considers weight of the cube as well. D: Upthrust is a result of the pressure difference at the top and bottom of the cube.
7	B	Assume that the force on top hinge E is pointing horizontally to the right
