

11 (C)

Let third particle be x from M_1 .

$$\frac{GM_1m}{x^2} = \frac{GM_2m}{(d-x)^2} \Rightarrow \frac{x}{\sqrt{M_1}} = \frac{d-x}{\sqrt{M_2}} \Rightarrow x = \frac{d\sqrt{M_1}}{\sqrt{M_1} + \sqrt{M_2}}$$
