

19 (C)

When one end is closed,

$$L = \frac{1}{4} \lambda$$

$$V = f\lambda$$

$$f = \frac{v}{4L}$$

When both ends are opened,

$$L = \frac{1}{2} \lambda$$

$$V = f'\lambda$$

$$f' = \frac{v}{2L} = 2f$$

20 (A)
