

7 (D)

Pressure of oxygen = atm pressure + pressure of mercury

$$= 1.01 \times 10^5 + 1.52(13.6 \times 10^3)9.81 = 3.038 \times 10^5 \text{ Pa}$$

$$\frac{\text{pressure of oxygen}}{\text{pressure of atmosphere}} = 3.038 \times 10^5 / 1.01 \times 10^5 = 3$$
