

- 17** Which of the following correctly states the changes, if any, in the potential energy and kinetic energy of the molecules of a solid as it melts?

|          | potential energy | kinetic energy   |
|----------|------------------|------------------|
| <b>A</b> | decreases        | increases        |
| <b>B</b> | increases        | remains the same |
| <b>C</b> | remains the same | decreases        |
| <b>D</b> | remains the same | remains the same |

temperature is constant when the solid melts

**14**

**Answer: B**

**19** The frequency of a wave is 600 Hz and its speed is  $330 \text{ m s}^{-1}$
