

- 9 A full barrel of weight W is being rolled up a ramp. The force P is required to hold the barrel at rest on the ramp. Friction between the barrel and the ramp stops the barrel from slipping.

Which arrow shows the resultant force that the ramp exerts on the barrel?

The line of action of the 3 forces need to intersect at a common point for rotational equilibrium.

8

Answer: C

10. An isolated dice is subjected to three forces, each given in terms of units of magnitude $\sqrt{5}$
