

$$I_o = \sqrt{8I} = 2.8I$$

- 23 B** By right hand grip rule, magnetic flux density at O due to P and Q points in direction of C.
Magnetic flux density due to R and S points in direction of A.
Hence resultant magnetic flux density at point O is in direction of B.

- 24 A** The point charge's velocity is parallel to resultant magnetic flux density at the centre of the two
