

		$\lambda = 2\lambda$ 0.00 2λ 2
14	C	I_1 is the same regardless of the orientation. (Students to understand that I_1 is half the intensity of the incident unpolarized light) I_2 will change according to Malus' Law ($I_2 = I_1 \cos^2 \theta$) where θ is the angle between the transmission axes of the polarisers.
15	A	There are effectively 6 loops spanned over a distance of 1.5 m
