

Thus, $P = \mathcal{E}^2 \div R = 5.6^2 / 6 = 5.23 \text{ W}$

28

C

Half-wave rectification is achieved with one diode:

For the above graph,

$$V_{rms} = \sqrt{\frac{V_0^2}{2}} = 0.71 V_0$$

29

A

$(\Delta x)(\Delta p_x) \geq \hbar$
