

		$F = 170 \text{ N}$
8	B	By conservation of energy, Loss in GPE = Gain in KE + W.D by resistive force $(600)(80 - h)(9.81) = [\frac{1}{2} (600)(12.0)^2 - 0] + (200)(1500)$ $h = 22 \text{ m}$
9	A	Force by engine + (Weight)sin(6.0°) – resistive force = 0
