

- 1** A student measured the mass and linear dimensions of a rectangular block in order to determine its density. The measurements are:

Height = (1.00 ± 0.01) cm

Length = (5.00 ± 0.01) cm

Breadth = (2.00 ± 0.01) cm

Mass = (80.0 ± 0.2) g

What is the uncertainty in the value of the density calculated?

A 0.01 g cm^{-3}

B 0.02 g cm^{-3}

C 0.1 g cm^{-3}

D 0.2 g cm^{-3}

- 2** Express the *volt* in SI base units
